Dear Sirs,

From March 2008 to October 2011 "Przedsiębiorstwo Remontowe PAK Serwis Sp. z o.o." seated in Poland, 62-510 Konin, Przemysłowa 159, took part as a subcontractor of MP/LP pipeline systems for new F and G units of 1,100 MW – BoA 2/3 located at Neurath power station, Germany.

The scope of works for PAK SERWIS included mainly the putting of medium- and low-pressure pipelines as well as assembly of proper fixing and support points in F and G units as follows:

- LAB, LAA feed water system
- main and ancillary (return) condensate: LCA, LCC, LCE, LCF, LCJ, LCL, LCM
- LCP reserve condensate system
- LBS steam extraction system
- LBG, LCN ancillary steam system
- SBA heating system
- QKA cooling medium system
- regeneration and rinsing equipment: LDP (plastic wires)
- LFN chemicals dosing system
- QFB central distribution of air for automatics
- general distribution of air for automatics: QFH, QFE, QFL, QFP
- X2 systems beyond the unit scope
- QAE provisional pipelines for etching

PAK SERWIS company always performed its duties professionally and according to the schedule.

As for documentation of prefabrication and quality and safety standards as well cooperation with the orderor and other contractors PAK SERWIS met the high requirements of the project in all respects.

A good process structure and work organization as well as the order and discipline of personnel helped successfully complete the task.

PAK SERWIS has relevant resources for such tasks both in terms of production and administrative staff and technical equipment.

PAK SERWIS can be recommended as a reliable and worthy contractor.

Yours sincerely,
Günter Rychlik
Board member
